

I would like a quote to scan the car shown in the following pictures. If possible, I would like the scan work to be performed at our shop:

***Mace Aviation, LLC
5456 E. McDowell Rd.
Suite 120
Mesa, Arizona 85215***

The car has the following Overall Dimensions:

168" Long x 72" Wide x 36" Tall (not including windshield)

The deliverable would be a .stp or .igs file of the cars exterior. I would like the scan to include the component split lines such as hood, door openings, trunk lid, head-light, tail-light boundaries, windshield frame, etc.

For reverse engineering purposes I would like the wheel edges and wheel centerline to be included in the scan. We are also discussing whether to scan the door jams.
